RELATORIU ANUÁL
ANNUAL REPORT
PRADET 2015
Psychosocial Recovery and development in East Timor (PRADET) became a national NGO in 2002 and now provides psychosocial services for people who have experienced trauma, mental illness, domestic violence, sexual assault, child abuse abandonment, trafficking, imprisonment and torture.

**PRADET’s vision** is for strong healthy community protects and support its most venerable people including those who are affected by trauma, mental illness and other psychosocial problems.

**PRADET’s mission** is to strengthen organizational relationship with government through the relevant ministries and other services in order to provide support to vulnerable people that experience psychosocial problems through education, counseling social support, rehabilitation, and medical and forensic services.

PRADET’s objective is;

To improve the quality of life and health of people who experience psychosocial problems through psychosocial support, treatment, rehabilitation, and education according to the national and international standard.
To Our Dear Stakeholders

2015 was another progressive year for PRADET to continue with dedicated commitment to provide psychosocial programs to the community, especially those who are vulnerable and living with a disability. PRADET maintains effective programs in line with our internal strategic plan and also the national strategic directions.

We have a long term vision and clear focus to maintain and strengthen working relationship with government departments and partner organizations to serve vulnerable people in Timor Leste. The dedication and commitment of our staff is central to us reaching this objective. We continually seek support and creative ways to improve our services in order to meet the needs of our clients.

This organisation has already existed for more than 10 years and continues to face many challenges. We accept that these challenges are part of the work we do and therefore we look for the lessons to be learnt and finally we want to make a difference in a positive way for our clients.

In 2015 PRADET has extended to the eastern districts with a base in Baucau that provides services to two other districts - Lospalos and Viqueque. This has been possible because of increased funding support from our main donor – Department of Foreign Affairs and Trade (DFAT) through The Asia Foundation (TAF).

This is another significant progress which will enable the community, especially individuals who experience domestic violence, sexual assault and/or child abuse to have access to our services. The establishment of this service brings more opportunity to collaborate with both government and other local NGO’s partners to provide holistic support to people who need it.

The growing of our services reflects our goal of “working by identifying the needs in the community and trying to fulfil it with integrated collaboration and support”

In relation to this I would like to say that PRADET and other civil society organisations roles and contribution are very much appreciated, because they expand the plans and the work that our government can do.
Overall I would like to thank the Donors, the Government and Civil Society Stakeholders and other wonderful friends who provide support to PRADET during the year of 2015. We could not achieve good outcomes in our services without their support.

Finally I want to acknowledge the worthy work of PRADET staff, both administrative and professional staff, who have dedicated their time during the year.

Silverio Pinto Baptista
Board President

2015 is the 2nd year for the implementation of our Strategic Plan 2014-2018. In this year we focussed on implementing our key goal to provide quality services and psychosocial support to people who need it.

The key goals have been realized through providing direct service and support to clients who need psychosocial support. The clients included those living with a mental illness who participated in our Psychosocial Rehabilitation Centre (PSR) and others who live in the community. We also work with victims of domestic violence, sexual assault and child abuse including clients who are victims of human trafficking, young prisoners and women prisoners in both Becora and Gleno prisons. Quality of services includes tangible support which enables clients to make changes in their lives. We have also created life skills training programs and small enterprises and other activities in Oecusse, Suai and Maliana as part of furthering our support after clients have accessed our frontline services in these municipalities.

The life skills training is a strategy to continue to encourage and support our clients in a more creative way to achieve some economic independence.
Capacity building for staff and partners is an essential part of improving the quality of services to our clients. PRADET staff have received several different trainings delivered by our partners. PRADET also continued to provide training for doctors and health workers on how to conduct medical forensic examinations and collect evidence as well as training to recognize non accidental injuries. We also conduct training on child protection policy.

In 2015 most donors have conducted organisational assessments with PRADET to see how our internal system is being managed and to provide recommendations for improvement. After some of these assessments PRADET received acknowledgement that some donor committed to use us as an implementing partner for the future.

In early 2015, the Christian Blind Mission (CBM), a long term donor who has provided funding for our mental health program since 2003, notified PRADET that they will stop funding from 2016. This presented us with a big challenge but it has enabled us to advocate to the Government for taken more responsibility in terms of funding support and also to continue to build partnerships with other donors. We are grateful to CBM for their support over many years.

Providing psychosocial support to vulnerable individuals and groups is not a simple work and it takes time to measure the outcomes. It can be challenging to meet targets and proposed outcomes. I thank all the individuals, the Timor Leste Government, Donors, Partner organizations and Community groups who have contributed to our achievements in 2015.

I acknowledge all of PRADET’s staff, volunteers and the Board for their continued commitment to ensure that PRADET is providing the best possible services to all our clients. We could not do the work that we do without their dedication and support.

Manuel dos Santos
Director of PRADET
Fatin Hakmatek-Victims of Violence

Fatin Hakmatek (Quiet Place) provides safety, emergency accommodation, counselling, medical treatment, medical forensic examination and documentation of injuries for people experiencing domestic violence, sexual assault, child abuse, abandonment and human trafficking. Clients are referred to other relevant services such as ALFeLa (legal services), MSS OPL (Child Protection officers), Uma Mahon (refuges) and health clinics and/or followed up by Fatin Hakmatek staff.

In 2015 there were 5 Fatin Hakmatek in Timor Leste. They are based in Dili, (covering the Municipalities of Dili, Liquica, Ermera, Aileu and parts of Manatuto,) Oecusse, (covering the Municipality of Oecusse,) Maliana, (covering the Municipality of Bobonaro,) Suai (covering the Municipalities of Covalima, Manufahi and Ainaro,) and Baucau (covering the Municipalities of Baucau, Viqueque and Lospalos.) The Dili service based in the National Hospital (HNGV), covers the remaining 5 districts after the Baucau service was officially opened in Baucau on 13th of June 2015.

In Dili Fatin Hakmatek midwife/nurse counselors have been accredited as Medical Forensic Examiners by INS (Institute Nasional da Saude), and to date the District services use trained and accredited doctors and midwives from the hospital where they are based, to provide treatment and perform medical forensic examinations. Apart from Baucau FH, that is sharing temporary rented premises with ALFeLa in Baucau, each Fatin Hakmatek has a custom built facility with 3 sleeping rooms for emergency accommodation, (maximum 3 nights) plus providing practical support such as food, basic needs and clothes. Plans are progressing to build a Fatin Hakmatek in Baucau with an Embassy of Japanese Grant of $90,900

In 2015 all Fatin Hakmatek received a total of 709 new referrals. Since opening the first service in Dili in October 2002, to the end of 2015, these services have received a total of 3,320 new referrals. The majority of referrals come from Police (70%) although this figure is higher in the districts.
Opening of FH Service in Baucau

Fatin Hakmatek service in Baucau was formally opened on 13th June 2015 with the appointment of a coordinator, counsellor and driver temporarily sharing an office with ALFeLa in Baucau. Guest speakers at the ceremony included the Director of Administration Baucau Hospital, TAF Nabilan and the Director of PRADET. Other guests included the President of the PRADET Board, representative from SEM, Baucau Commander PNTL and VPU, all accredited medical forensic examiners from the hospitals and health services in Baucau, Viqueque and Lospalos and the Directors of those hospital/health services, Uma Mahon Paz, MSS OPL, ALFeLa and represent-
Medical Forensic Examiners
A medical forensic protocol to document injuries and other evidence was first developed in 2004 and subsequently revised by Fatin Hakmatek. Training to become an accredited examiner consists of 5 days of theory and 5 days of practicum with a written examination at the end. Fatin Hakmatek has produced a training curriculum and handbook that has been accredited by the Ministry of Justice, the Ministry of Health and Institute Nacional da Saude, (INS).

In September/October, 2015, 17 more doctors, midwives and nurses received 5 days of theory in Suai and then completed their 5 days of practicum, observing and performing examinations under supervision in Dili FH. Participants included doctors and midwives from Oecusse, Suai, Maliana, Ainaro and Same Hospitals.

This brings the total number of health workers, (doctors and midwives) accredited as medical forensic examiners to 50 although in 2015 only 34 were actually working with Fatin Hakmatek. In 2015 they were based in the hospitals in Oecusse, Suai, Ainaro, Same, Maliana, Baucau, Lospalos and Viqueque. The rest had either moved to other places or were completing further studies.

Fatin Hakmatek has produced a curriculum and manual for 2 day training on “Recognizing and Responding to Non-Accidental Injuries”. WHO research shows that most people who have non-accidental injuries will seek assistance from local health centers for their injuries. So it is important that health centers can respond effectively and not just send the injured person home again, possible to more violence.

Fatin Hakmatek provided this training 3 times in 2015. On 19/20 June Fatin Hakmatek provided this training to midwives and 10 birthing attendants from Clinic Bairo Pite. On 23/25th September to 17 health workers from 7 Dili Community Health Centers and Bairo Pite Clinic. On 28/29th September to the 14 doctors completing the Family Medicine Program organized by RACS (Royal Australasian College of Surgeons.) In November 2015, 18 health workers in Oecusse received this training.

Other Trainings. On 1st July 2015 Fatin Hakmatek facilitated a half day presentation at the Conference for 100 VPU organized by TLPDP. On 11th August Fatin Hakmatek provided 1 day training on the medical forensic protocol to ALFeLa. In October 2015 Fatin Hakmatek provided 2 day community education to students and their parents in Baucau Secondary High School.
Client story

She is 19 years old. She lives with her family and she studies for her high school levels. On Christmas day her sister and brother in-law invited her to go out and buy some new clothes so she went with them. After shopping her sister sent her with her brother in-law to buy some cake, and so she went with him. Her brother-in-law took her in his car to a remote spot where he sexually assaulted her. She screamed a lot and he threatened her if she told anyone. When they arrived home her mother noticed her clothes were dirty and she was bleeding a lot. At first she only cried then she told her mother what had happened. Her parents took her to the police who then rang Fatin Hakmatek asking for transport to bring the victim to the Hospital – FH assisted so she could receive emergency treatment because she was bleeding a lot. She was then admitted to the maternity unit in HNGV for surgery and treatment. After her surgery, Fatin Hakmatek provided a medical forensic examination and documentation, counselling, follow-up treatment, liaison with ALFeLa, and then home visits every 4 weeks. The offender ran away and the police could not find him until 6 months later when he went to the police and confessed. This was reported in the newspaper. He has been arrested and charged and is in remand (prison) waiting for the trial. The girl has recovered from her physical injuries and will be glad when the case is finished. Her family is very angry with the offender and they have no contact with him.

PDAJJ Program provides activities and psychosocial support to women prisoners in Gleno, young prisoners in Becora, and all who are detained in 72 hour detention in Dili. The program also provides training in the community. In 2015 the activities included art, yoga, drawing competitions, music, counseling, family support and accompaniment, education on drugs and alcohol, managing emotions, good communication, personal development, gender role stereotyping and changing domestic roles in families. We are grateful to our donors – The Asia Foundation (HAKOAK Program), UNICEF and Australia Foundation for Asia and the Pacific (AFAP).

The objective of the program is to provide support to young prisoners and to women in prison and to increase the knowledge of the community on drugs and alcohol, improve family relations and personal development and therefore to enable changes in family life in Timor Leste.
Prison Visiting Program

The activities involved 38 young prisoners in Becora Prison. The program we facilitate is trying to reduce the psychological pressure the young people feel being locked up in a very small space. We also work to provide family support encouraging the young prisoner’s families to visit the prison. Some families did attend with support from PRADET which was very important to their family member in prison. PRADET integrates its programs so that the young men and women in prison can receive information on mental health and psychosocial wellbeing.

PDAJJ and PAMM provide psycho-social activities that increase the knowledge of women who are prisoners in Gleno. The activities include art and craft, relaxation such as yoga, education on women’s health, drugs and alcohol and managing emotions. This is funded through The Asia Foundation (HAKOHAK Program), UNICEF and The Australian Foundation for Asia and the Pacific (AFAP). There were 24 women in prison at this time.

The staff of the program carry out daily assessments of all prisoners attending 72 hours detention. We can then organize education and counselling depending on their needs. We carried out 215 assessments, most were men.

Prisoner Story

A.C is a prisoner from one of the municipality, who came to prison at the age of 17. He was charged with murder. A.C was active in the PRADET program in Prison and felt changed. He said “I am as prisoner who has just come to prison for 3 months, everything is new for me. Sometimes I sit quietly alone and do not know what to do, when I think about the future as a guilty person. I really feel depressed as I am not ready yet for the next court session where I will hear the sentence given to me. Therefore, PRADET support is valuable in my situation. I feel less alone because there are people to listen to me and care for me. They teach me about anger management so I can control my feelings”.

I am happy, because of the activities provided and the other things including support to my family to visit me, providing sports material and other basic needs to entertain, shared information to change my attitude in the future. This is important for when I return to my family and community. The information I received will be a reference to improve my life in the prison. With the support from PRADET I am now ready to attend the next court that will be held next year. This is because the prison is not place to punish but it is the place for mental rehabilitation for every prisoner.

The Tau Matan program was supported by the Ministry of Social Solidarity (MSS) working with government’s institution such as the Immigration Police, and other national and international NGOs to provide services to victims of human trafficking in Timor Leste. Tau Matan receives victims and organises shelter, counselling and supports basic needs for the victims. Tau Matan program also organises workshops to educate on human trafficking to the 152 Border Guards. Socialization was also provided to 106 participants consisting of students and teachers in border areas that are considered to be possible areas for human trafficking such as Maliana (Batugade and Tunu Bibi) and Lospalos. The objective of these workshops were to equip them with the information of how to identify and recognise the activities of human trafficking.

By working together with partners and community, the Tau Matan program received and accommodated 11 referral victims consisted of 4 men and 7 women. There was also an experience with 5 victims (4 women and 1 man) that were identified as victims of human trafficking at the Dili Airport. These victims were being flown from Dili to England as they had been promised support to get work with a good salary in England. Through the documents checking, Police identified that these victims did not have the relevant documents to work overseas. Therefore, they were referred to PRADET for further assessment and shelter assistance. Finally, PRADET together with Police returned them back to their family in Municipality.

PAMM is a priority program in PRADET that is supported by Ministry of Social Solidarity, Christian Blind Mission, The Australian Foundation for the Peoples of Asia and the Pacific–AFAP and Rotary in 2015. The objective of the program is to support people living with mental illness, promote public awareness about people living with mental illness and reduce the discrimination and stigma suffered through offering training, workshops, socialisations and the education of families and the community.

The program activities provided by PRADET’s counselors include providing clients assistance to meet basic needs such as food (rice, oil, noodles, soap etc). This is supported through MSS for the most vulnerable clients. Assessment of medical treatment in health facilities is important because PRADET staff are trained mental health workers who collaborate with Mental Health Case Managers in municipalities to plan activities, to assess the needs of clients and to plan referrals including referring to the Psychiatrist at HNGV and the St. John of God Centre in Laclubar for intensive treatment.

Then we continue to follow clients when they reintegrate back into their families and communities to try to assist them with social inclusion. We also reinforce their health needs including encouraging them to take their medication and encourage the clients to participate in the program offered at our PSR Centre in Dili.

This program offers a broad range of activities to clients including computer skills training, cooking, dancing and music, sewing and weaving, yoga and recreation activities.

PAMM is involved with the following municipalities: Liquica, Ermera, Aileu, Ainaro, Baucau, Manufahi, Dili-Post Administrative Atauro. The PAMM program assisted a total of 379 clients in 2015.

Atividade programa nian ne’ebé mak fornese husi PRADET nia konselor siria inklui fo asistensia baziku ba cliente siria hanesan aihan (fos, supermie, sabaun no etc). The Personal Development Course (PDC) activities for the year 2015 involved running the program in 10 sucos of the Covalima Municipality. Because of its success we continued with the same course we had run in 2014 with support from UNDP.

In 2015 PDC was implemented in the following five sucos. The course was run in sucos of Matai, Tazhilin, Zulo, and Raimea with continued funding support from UNDP. We also ran the course in the sucu Camenasa with support from TAF who also supported the follow up that was done in all 5 sucos. The course involves workshops on managing emotions, calming strategies, good communication, creating good relationships, gender and culture, domestic violence, drugs and alcohol and gender equality. The course depends on good collaboration with local leaders because they provide the information to the families and the broader community.

The objective of the PDC course is to reduce violence in the community, to promote gender equality and to make changes in attitudes and behaviors within the homes.

To be able to know the impact of the course, we follow up participants and their families and interview them to see if any change has occurred in their family life since they took part in the course.

These interviews are carried out in their home and focus on practical changes that have happened as a result of the training – eg. Is the participant taking on some of the caring and cleaning duties in the home?
Personal Development Course (PDC) nia atividade iha periodu 2015, foku ba parte rua hanesan kursu no follow up iha suku 10 ne’ebé mai husi muni-sipiu Covalima. Atividade ne’e hanesan kontinuasaun husi tinan 2014, ne’ebé hetan suporta husi UNDP.

Participant Interview Follow up

Training Activity
Rastiana da Costa - Story

I used to argue with my husband and we would hit each other and then he would swear. Then one day I was lucky to receive an invitation to participate in the PDC course which was delivered by PRADET. I learnt about emotional management, calming strategies, good communication and creating schedules to share work. I applied all this information to my own home situation and also explained the information to my husband.

In my experience when my husband and I were angry each other we could not talk to each other for one or two weeks. We look at each other very angrily and with a hard face. On one occasion, I used the knowledge I learnt to apply it in the following situation that we both encountered:

Recently, my husband and I had a quarrel because our child fell from the bed. At the time, I tried to use the calming strategy of “deep breathing, keeping quiet and not reacting”. I was waiting until the situation calmed down and then I approached him by using the “kiss strategy”. I kissed my husband and embarrassed him. I was also using a good communication method to explain what happened. He then understood the situation. At the time, we were starting to think about how to share work including looking after our child. One day, my husband looked after our baby for a whole day and he recognized that the work involved in looking after our baby is a heavy job. My husband regretted his lack of understanding of this and learnt that looking after a child is not an easy job.

Through using the method I learnt on the course I can reduce the small problems that sometimes do not get resolved for a long time. Now we are able to solve the problems straight away with no negative result.

I had learnt valuable material in the 6 days course I attended. I learnt very important information of the method that can be used to develop a peaceful environment in my family. I had learnt valuable material in the 6 days course I attended.
Uluk hau ho hau nia laen sempre istori malu to’o baku malu no dala balu nia hasai lia fuan ne’ebé hau lamerese. Hanesan sorte ida, hetan konvite, partisipa iha kursu ne’ebé fasilita husi PRADET hodi aprende kona-ba oinsa kontrola emosaun uza stratejia kalma, halo komunikasaun diak, halo horario hodi fahe servisu ba malu. Hau uza informasaun hirak ne’e hodi aplika ba hau nia an no esplika mós ba hau nia laen.

Hanesan esperiensia ne’ebé hau hasoru katak wainhira hau hirus malu ho hau nia laen, ami nain rua lakoalia durante semana 1 to’o 2 nia laran, dala balu ami hatudu jestu hare malu oin bo’ot deit. Iha tempu ida, hau uza stratejia sira ne’ebé mak hau aprende hodi aplika ba situasaun ida ne’ebé mak ami nain rua hasoru henesan esperiensia tuir mai.

“Foin dadauk ami rua hirus malu tamba labarik monu husi kama leten. Hau nia laen hirus los. Iha momentu ne’e, hau koko uza stratejia kalma hanesan dadais naruk no koko atu laresposta hasoru nia. Hau pasensia hein to’o situasaun kalma, hau hakbesik ba nia uza stratejia “rei” hau rei hau nia laen no hakuak tiha nia. Hau mós uza meius komunikasaun diak hodi esplika situasaun ne’ebé akontese. Ikus mai, hau nia laen komprende kona-ba situasaun ne’e. Hahu husi ne’e, komesa mosu hanoin ba ami nain rua hodi halo oráriu no fahe servisu uma laran inklui troka malu hare labarik (ami nia oan). Wainhira orariu muda ba hau nia laen hodí hare labarik durante loron balu, hau nia katua oan rekoñese katak haree labarik ne’e servisu todan. Hau nia laen aprende no arpende katak haree labarik ne’e servisu ida ne’ebé laos fasil tamba ne’e nia hili atu halo servisu seluk no tein deit tamba haree labarik todan liu.

Ho meius sira ne’ebé hau aprende no uza maka problema ki’ik ne’ebé dala balu ami dada to’o tempu kleur, agora ami bele resolve kedas ho dalan nebe diak no lahamosu resultadu nebe negativu. Hau aprende ona materia ne’ebé valor tebes, bainhira hau partisipa iha kursu durante loron 6.
The Blue Dress Run
In November 2015 PRADET staff took part in some unique fundraising activities. The Dili Hash Harriers organized a Blue Dress Run to raise funds for mental health and kindly donated their funds to PRADET. Five of the staff at PRADET took part in the event which involved walking through the streets of Dili wearing a blue dress. The staff at PRADET got into the spirit of it with some marvellous costuming and little embarrassment it would seem.

PRADET would like to thank Corey and Tori and all the Hash Harriers who participated for their support in organizing this event which raised $585.00. We would also like to thank the Rotary Club of Dili who contributed a mini van to PRADET to transport clients to attend PSR Centre.

We look forward to next years.

Movember
Seven of PRADETs staff also took part in Movember. Movember was supported and organized by Captain Nathan Graham from the New Zealand Defence Force. It raised $6,600.00 for PRADET’s work. This is the first time that PRADET’s male staff had participated in such an event. You can judge for yourself if you think their moustaches are an asset or otherwise.

Many thanks to Nathan and his work colleagues who supported this and raised so much money. $1,055.00 of this money was carried over from last year’s fundraising after Chris Jackson who has a construction company in Dili donated his time to finish the construction of seating for visiting families at the National Hospital. His generosity was PRADET’s gain.

PRADET intends to use these funds to purchase weaving looms and other craft materials so clients can learn crafts, such as TAIS, and then sell the craft they produce. We would like our clients to have economic independence. We plan to develop our Day Centre so that we can teach good quality craft that is able to be sold by clients to support themselves and their families.
Movimento Kamiza Azul

Iha fulan Novembru 2015 staff PRADET hola parte iha atividade uniku ba halibur fundus. Dili Hash Harriers organiza ona Blue Dress Run atu halibur fundus ba Saude Mental no fó fundus ba PRADET. Staff nain 5 husi PRADET hola parte iha eventu ne’ebé involve lao iha Dili laran, hatais ropa azul. Staff PRADET iha espiritu ba atividade ida ne’e no iha kustume furak, maske moe oituan.

PRADET hakarak agradese ba Corey no Tori no Hash Harriers hotu ne’ebé partisipa hodi organiza eventu ida ne’e, ne’ebé hetan ona osan dollar $585. Ami mós hakarak agradese ba Rotary Club of Dili ne’ebé kontribui ona kareta mini bus ba PRADET hodi fasilita kliente sira tuir atividade iha sentru rehabilitasaun.

Ami espera ita nia koperasaun iha tinan sira tuir mai.

Movember

Staff PRADET nain hitu mós hola parte iha Movember. Movember suporta no organiza ona husi Kapitun Nathan Graham husi forsa Defesa Nova Zelandia. Ho eventu ne’e halibur osan hamutuk U$6,600.00 hodi suporta servisu PRADET. Ida ne’e hanesan dahuluk ba PRADET staff mane sira partisipa iha eventu ne’e.

Ita boot bele kontribui mos se ita hanoi sira nia hasanrahun dalaruma sai hanesan vantajen ida.

Agradese barak ba Nathan ho nia kolega servisu ne’ebé suporta ona atividade ida ne’e hodi halibur osan ne’ebé signifikante. Osan U$1,055 ida ne’e kontinuasaun (carried over) hodi halibur fundus tinan kotuk nian depois Chris Jackson iha kompanha konstrusaun ida iha Dili ne’ebé fó nia tempu atu remata konstrusaun fatin tur ba familia vizitante sira iha Hospital Nasional. Nia iha laran luak tebes ba PRADET.

PRADET hakarak uza fundus ida ne’e atu sosa material produzaun liman badaen nian nune’e cliente sira bele aprende hanesan TAIS, nune’e bele faan sira nia liman badaen ne’ebé produz ona. Ami hakarak ami nia kliente iha ekonomia rasik. Ami planu atu dezenvolve ami nia sentru nune’e ami bele hanorin liman badaen kualidade diak ba kliente sira hodi suporta sira nia an no familia.
